NEW LOGO LAUNCH

HELLO NEW LOGO!

Unique, contemporary, value-based and perfectly representing our culture in its freshness. Regeneration is a process, and that is why we become more organic with moving elements.

We are a global organisation that supports science, research training, and education in oral tissue regeneration since 2003. Our objective is to develop and share knowledge, leading to evidence-based clinical practice and improved patient care.

True to our motto “Linking Science with Practice in Regeneration”, the Osteology Foundation bridges the gap between scientific advancement and contemporary clinical practice in oral tissue regeneration. Our core activities include funding of research and organisation of symposia throughout the world. Furthermore, our online platform THE BOX provides education, tools, and networking possibilities for researchers and practitioners in oral tissue regeneration.

We launch our new logo in phases, starting with the promotion of the International Osteology Symposium 2023, where we will also reveal the story behind.
