

# THE BOX

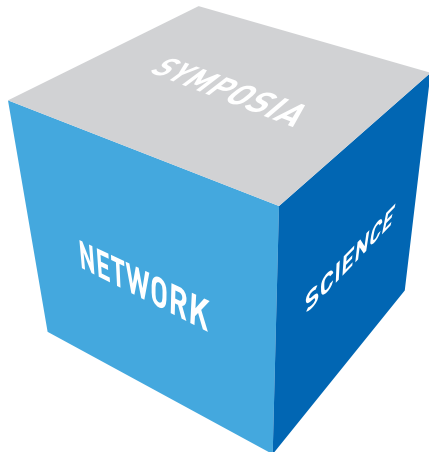

## THE GLOBAL OSTEOLGY COMMUNITY PLATFORM

It is a big challenge to link scientists and practitioners in a continuously growing global context and also a fundamental part of the Osteology Foundation's mission: promoting research and education in oral tissue regeneration worldwide.

With this in mind, the Osteology Foundation has set up the novel Global Osteology Community Platform THE BOX, which on the one hand provides information and tools, but on the other also connects scientists and practitioners worldwide, and supports all existing activities of the Osteology Foundation online.

**SCIENCE WITH PRACTICE**  
IN REGENERATION

## YOUR PERSONAL COCKPIT

In My BOX you find the latest news from your network and everything you have saved, contributed, or where you were involved with the Osteology Foundation.

### My Contacts

Search for colleagues and friends, sort them into networks and set up your own personal profile.

### My Groups

Join discussions, exchange information and interact with colleagues worldwide.

### My Courses

Here you find your certificates as well as scripts and e-learnings from courses you attend.

### My Research

Apply for your research funding or a scholarship, submit a poster abstract and sort your research projects.

### My Practice

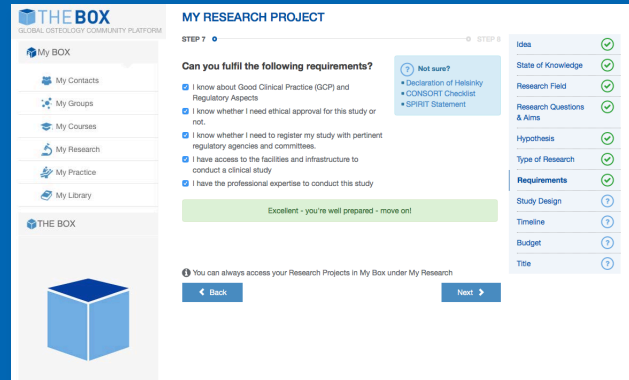

Upload your clinical cases to the Case Box, analyse, share and discuss them with your network.

### My Library

Bookmark the content that is most relevant for you.

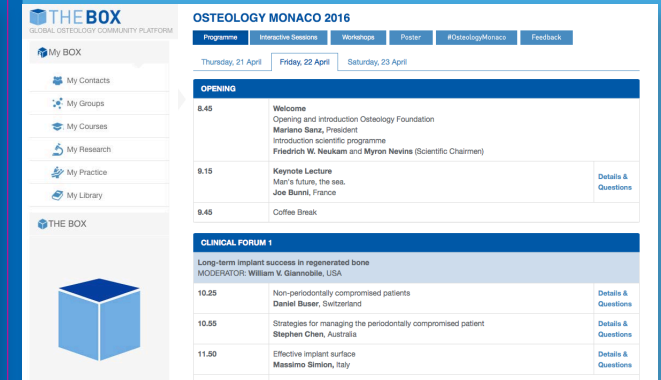

## SCIENCE

Plan your Research Projects with the help of the Osteology Research Wizard, a novel tool that guides you step by step through the process and redirects you to important resources. Further information about protocols and scientific background is available in the online versions of the Osteology Research Guidelines.

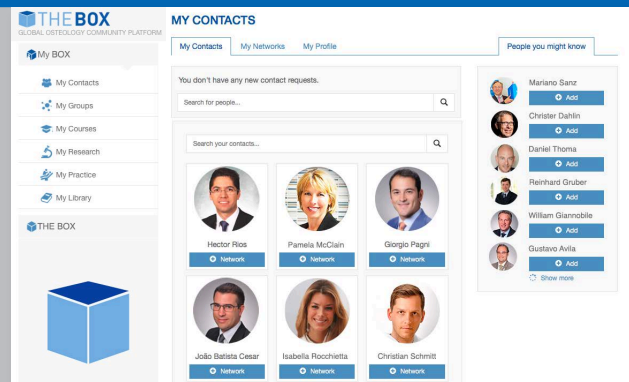

## SYMPOSIA

A real additional benefit to the live event! Here you will find the programme, you can browse through all abstracts and you can also find the posters here in an online poster exhibition. Contact the authors and speakers directly online and send a question to the experts.

## NETWORK

Interact with researchers and practitioners worldwide, extend your personal network, find new contacts, join discussions with experts, and become part of the Global Osteology Community.

## PRACTICE

The Case Box helps you document and evaluate clinical cases in oral regeneration. You decide whether you want to share your case with your network, discuss it with a colleague or keep it private. You can also browse through the public Case Collection.
