## OSTEOLOGY MONACO 2016

**OPEN QUESTIONS IN REGENERATIVE DENTISTRY**

*The International Osteology Symposium returns to Monaco in April 2016 – a highlight in the congress calendar for many dentists, oral surgeons and scientists. The scientific programme will focus on open questions in regenerative therapy in dentistry.*

The International Osteology Symposium, which is organised by the independent Osteology Foundation, takes place every three years and focuses on the topic of oral regeneration. The scientific chairmen of the upcoming congress, Prof. Dr. Friedrich Neukam and Prof. Dr. Myron Nevins, have put together a programme full of exciting topics for the symposium in Monaco 2016, topics which will appeal to both practitioners and scientists doing research in this field.

Under the motto “Learning the «WHY» and the «HOW» in regenerative therapy”, 85 renowned international speakers will discuss the most important questions pertaining to oral regeneration and the latest scientific insights, as well as presenting innovative technologies and concepts.

**The topics of the scientific programme at a glance:**

- Long-term implant success in regenerated bone
- Clinical decisions for posterior maxilla
- Teeth for a life time
- Treatment options to improve aesthetic outcomes
- Complications in implant patients
- GBR - What is the news?
- Peri-implantitis - Why does it occur and how do we treat?

The interactive discussions, where experienced international experts discuss questions from the audience as well as presenting different points of view and approaches, promise to be a special highlight. Interactive discussions will be held on the following topics:

- Decision making after tooth extraction
- Treatment of demanding gingival recession

### **Basic and clinical research**

Those interested in science will also not miss out in Monaco 2016: the most exciting results from basic and clinical research will be presented in the Osteology Research Forum. There will also be a major poster exhibition. Abstracts can be submitted via the congress website up to 1 December 2015.

### **Learning from the experts**

The scientific congress programme will be supplemented by workshops. In practical and theoretical courses, the experts in each field will pass on techniques, tips and tricks.

For the first time, the Osteology Symposium 2016 in Monaco will also offer Master Clinician Courses on a variety of current topics whereby leading experts worldwide will focus on conveying techniques and treatment concepts.

### **Current news from industry**

Theoretical and practical workshops by the sponsors as well as the Implant Forum on Saturday, with speakers selected by the industry partners, will ensure that the latest product developments and therapeutic concepts from industry are also allowed for.

**Registration for the International Osteology Symposium 2016 opens in October 2015. More detailed information on the programme and the organisation is available on the congress website [www.osteology-monaco.com](http://www.osteology-monaco.com).**

## ABOUT THE OSTEOLGY FOUNDATION

The Osteology Foundation's motto is „Linking Science with Practice in Regeneration“. The foundation was established in 2003 and its core activities include funding of research projects and organisation of national and international symposia throughout the world. In recent years, the Foundation has expanded its focus. Today, it also offers courses and textbooks specifically for researchers in the field of oral tissue regeneration.
